

CALIBRATION MANAGER

Calibration management for
Instruments, Measuring tools, Jigs ...

The Paper Tiger Calibration Manager is a tool designed to make calibration management simple. It addresses the common issues of tracking which instrument is due for calibration when, which instrument or tool is issued to whom as well as more complex issues like CPK calculations. The database is inexpensive and easy to learn. It can link up with Paper Tiger BSM for automatic down loading of locations and staff. The Calibration Manager can run as a stand alone program or over a network with shared data. Reporting is simple with the built in report generator. With the Calibration Manager instruments will not slide out of calibration nor disappear out of sight.

PLANNED CALIBRATIONS AND SERVICES

- Schedules regular calibrations and services
- Assigns calibrations and services to Staff and Contractors
- Generates service schedules by Location by Contractor by Type ..
- Monitors calibrations due and overdue
